

# NDIS Program Overview

Our program is designed to support the unique needs of each individual, promoting independence, inclusion, and overall wellbeing. We are dedicated to providing comprehensive and individualised disability services for children and young people.

Below is an overview of the services we offer:

## Assistance with daily living

We provide personalised support to help children and young people with disabilities manage daily activities, fostering independence and enhancing quality of life. Our trained staff assist with tasks such as personal hygiene, meal preparation, and household chores, ensuring each individual's needs are met with dignity and respect.

## High care and complex needs

For individuals requiring specialised support, our team delivers tailored care plans addressing high care and complex needs. We collaborate with healthcare professionals to ensure comprehensive and coordinated services, including medical management, therapeutic interventions, and continuous monitoring to maintain optimal health and wellbeing.

## Supported Independent Living (SIL) housing and accommodation

Our SIL housing options offer safe and supportive environments where young people with disabilities can live independently. We provide accommodation equipped with necessary modifications and support services, promoting autonomy while ensuring access to assistance when needed.

## Community access and transport

We facilitate community engagement by offering transport services and support for participation in social, educational, and recreational activities. Our goal is to enhance social inclusion and provide opportunities for personal growth and community involvement.

## Community nursing

Our qualified nurses deliver healthcare services within the community, including medication administration, health assessments, and coordination of medical care. We aim to manage health conditions effectively, preventing hospital admissions and supporting overall health.

## Group activities

We organise group programs that encourage social interaction, skill development, and peer support. Activities are designed to be enjoyable and therapeutic, promoting friendships and social skills in a supportive environment.

## Individual and personal care

Personalised care services are tailored to meet the specific needs of each individual, focusing on personal development and daily living skills. Our dedicated staff work closely with families to ensure consistent and compassionate care.

## In-home drop-in support

We offer flexible in-home support services, providing assistance as needed to maintain independence at home. Our drop-in support includes help with daily tasks, companionship, and respite for family caregivers.

## Respite care

Recognising the demands of caregiving, we provide respite services to offer temporary relief for families. Our respite care ensures that individuals receive high quality support in a safe environment, allowing caregivers to rest and recharge.
